Subject: Confirmation of the operating activities ACCIAIERIE VENETE SPA

On 8 March 2020, the Directive issued by the President of the Council of Ministers on new emergency measures to prevent the increasing spread of the Covid 19 virus came into effect. After careful evaluation of this measure and also taking into account the interpretation circulars subsequently issued by the Government and the Ministries involved, the Acciaierie Venete Steelworks Group announces that all production and logistics activities can be properly continued at all production sites.

Therefore, all significant stages of the production process, including the loading and unloading of goods, will continue to be performed as normal in strict compliance with the most effective prevention and precautionary measures, which our Group has already implemented in the last few weeks in accordance with the legal directives.

We are all confronted with a new and unexpected emergency situation that is seriously affecting our behavior and habits. Despite our discomfort in working under these conditions, we firmly believe in the necessity and correctness of the measures taken to prevent the further spread of the virus, while ensuring continuity of work, not only for our employees, but also for all customers and suppliers of our Group.

The Direction
